One Million Prompts — Dubai Future Foundation · 2026

Cybersecurity Fundamentals — IBM · 2026

Intro to Modern AI — Cisco · 2026

Intro to Cybersecurity — Cisco · 2026

IT Essentials · OS — Cisco

LANGUAGES

English (Fluent) · Tamil & Malayalam (Native)
Arabic & French (Basic)

PROFILE

I build AI tools and actually ship them — four so far, all on GitHub. I built one of them, SENTRY, at the Dubai Customs × University of Dubai hackathon. I'm Cisco-certified in AI, cybersecurity, and IT, and I can start whenever you need me, full-time or part-time, in person or remote.

PROJECTS

■ SENTRY — AI Cargo Intelligence

Hackathon · 2026

Turns scanner images, customs data, and watchlists into one 0–100 risk score per shipment — doing in seconds what usually takes 20+ minutes by hand. Built at the Dubai Customs × University of Dubai hackathon.

JavaScript · HTML/CSS [Live demo](#) · [Code](#)

■ Barjeel — Offline QR Scam Scanner

2026

Checks where a QR code actually leads before anything opens — catching lookalike Cyrillic domains, punycode and subdomain deception that a phone camera shows you but never evaluates. 20 checks, runs fully offline, 73 tests.

JavaScript · Web Workers · PWA [Live app](#) · [Code](#)

■ NoorDesk — Multilingual AI Front Desk

Open-Source · 2026

An offline AI front desk that reads customer messages across 6 apps and replies in the customer's own language. 5 languages, scam-aware, 45+ tests.

Python · FastAPI · Ollama [Code](#)

■ AccessAudit — Access & Offboarding Console

2026

Flags staff who still have access they shouldn't — old logins, over-access, dormant accounts — each fixable in one click, with a full audit log. 36 tests.

Python · FastAPI · SQLite · Claude API [Code](#)

■ NMS — AI Network Monitoring

Open-Source · 2026

Monitoring for small IT teams with self-healing automation and a Python model that predicts disk failures before they happen. Ships as a one-click installer.

Python · Prometheus · Grafana [Code](#)

EXPERIENCE

■ WordPress Web Developer — Best Pick Mart, Dubai

2024 – 2025

Built and ran the online store almost single-handed: the storefront, 100+ products with AED pricing, a working payment gateway, and the on-page SEO. Stayed online throughout.

WordPress · WooCommerce · Payment Gateways · SEO
